-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11 and 14-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Are the twice recited "side rails", as set forth in claim 11, line 21, different elements as suggested?

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Leon in view of either Peachee or Newville and Logan Jr. Leon shows the claimed sawhorse with the exception of the side rails and holes. Peachee shows side rails 2. Newville shows side rails 26a, 26b. Logan shows a sawhorse in a stored condition with unassembled sections bolted to each other. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Leon with side rails, as taught by either Peachee or Newville, that is capable of increase his supporting surface, and to modify the sections of the sawhorse of Leon to comprise

spaced holes, as taught by Logan, which are capable of accepting cords therethrough with his section in a stacked position.

Claims 4,6,10,11 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leon, and either Peachee or Newville and Logan, as applied to claim 1 above, and further in view of Thomson et al. Thomson shows a handle at 131,140 for passing through holes of a column. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Leon with a handle, as taught by Thomson, which is capable of being used as a handle for his sawhorse. Furthermore, the examiner takes official notice that notches with lobed bottoms to facilitate assembly is conventional, and it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify to notches of Leon to comprise lobed bottoms, in view of the conventional teaching to facilitate assembly.

Claims 8,9,14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leon and either Peachee or Newville and Logan, as applied to claim 1 above, and further in view of Fields. Fields shows a handle 14 with dowel 26 stops. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Leon with a handle, as taught by Fields, which is capable of being used as a handle for his sawhorse. Furthermore, the examiner

takes official notice that the use of cords for a handle is a conventional practice, and to substitute a cord for the strip 14, as is conventional, would have been obvious to one of ordinary skill in the art in view of the conventional teachings.
